1 June 1967

NOTE FOR: Carl

1. Several quick items:

25X1A

a. The meetings with [] and company are going well. I believe the draft memo to the Office Directors provided some useful reassurance regarding S&T relationship to the other Directorates. This meeting (Monday) ended up with a recognition that an Agency-wide coordination scheme was required if any TSD/ORD interface arrangement was to survive. I volunteered to review the history of Agency coordination.

25X1A

25X1A

b. I checked with Col. White to see that there was nothing inconsistent in the draft Notice on Agency coordination which was circulated April a year ago with the discussions which you are now having on this problem. With his blessing I reviewed the activities since August 1965 and passed out copies of the draft Notice. [] was amazed that the draft Notice had lain dormant for a year. [] was well up on the subject since he had actually written the DDP's reply. At the moment I believe the group is anxious to urge adoption of the draft Notice on the time schedule which I had suggested in a memo I drafted for you detailing your understanding of the R&D coordination to Col. White in March, i. e., DD/S&T complies 1 July; other Directorates use the Handbook and develop necessary changes by December of this year; with everybody in the pool beginning FY 69.

25X1A

c. Wouldn't it be wise to go ahead and distribute copies of the draft guidance memo to the Office Directors? Copies are now in PPB, S&T staff, and the [] group -- which includes []. The S&T Office Directors may well feel that they are in the position of being the last to know.

25X1A

d. Getting the ADP lined up for the Contract Information System is taking some doing. It appears to me that OCS wants to redo the homework of 2 years and design the system rather than to design the software. I will continue to press on this.

-2-

25X1A e. The attached memo to [] with your concurrence, may be useful at this time to sort of close off our participation in the [] business. I think we have done about all we can, and I suspect that the matter of patent rights will become a matter of negotiation.

25X1A

f. Attached to the minutes of the [] Committee for 31 May are a set of comments which Steve prepared. I begin to have problems beginning with Item 3 because the logic here must be based on the assumption that good guys will naturally get together and R&D problems just won't happen -- which isn't likely. I believe, however, that DDP is anxious for an arrangement based on the draft Notice of a year ago.
